

FAYETTEVILLE- MANLIUS LIBRARY MEDIA CENTER

November 2021

New and Noteworthy

- We now have a sublimation printer and cricut in the library makerspace. Make mugs and t-shirts with a club. Create eye-catching displays in your classroom. Add vinyl decals to just about anything (permanent and removable vinyl are available). Cardstock, vinyl, and fabric are just a few of the materials that can be cut using a cricut machine. We will be offering training for any students or staff interested in learning about how to use the new equipment!

Website of the Month

Untold History is a free collection of short, compelling, history videos and animations designed to engage new audiences in a new conversation and shine a light on the stories that don't always make it into the classroom and question what we think we know about those that do.

Untold has videos that cover a variety of subjects. There are famous historical speeches, videos on medical advancements and debates, art that changed America, informational videos about famous people (across many disciplines), and so much more!

COLLABORATIVE IDEA OF THE MONTH

As much as we all love technology, sometimes it's nice to take a tech break for a project. In the library we can help your students make a zine on any topic. Zines are a chance for students to merge text and pictures to share their ideas and communicate their knowledge on a particular topic!

IN THE LIBRARY

Virtual reality tours are up and running! Have your students take a tour of the National Constitution Center or the White House. Take a virtual visit to the National Museum of Science and Technology. Explore Brooklyn's botanical gardens. Visit the Pyramids, Antarctica, or even space!

Email Mary or Andrea with a topic or place and we'll get back to you with different options that might work for your class to virtually visit!
